Service Availability & Pricing

Service availability is dependent on geographic location. Broadband zones are based on the industry's current zoning of Telephone and Broadband exchanges. On-Net covers most metro areas, while Off Net services are generally located in regional areas. To confirm which zone applies to your broadband service, please speak to a customer service representative.

Broadband Speeds

We will always connect you to the highest available speed. Where possible this will be an ADSL2+ connection and where ADSL 2+ is not available to you will be provided with an ADSL 1 service. Broadband speeds are impacted by a range of factors including the length and quality of the copper line between your premises and the exchange, your computer's set-up, the quality of your broadband modem and line filter. The number and type of services being used in your area as well as the configuration of any computer you are trying to access can also impact the speed.

Installation Charges

These plans include a standard installation.

Installation charges apply when connecting a new fixed line service. The connection charge will vary depending on whether a technician is required to attend the site to complete the connection and if cabling work is required.

Connection & Restoration Timeframes

Where you request a new connection we will endeavour to connect the service on the date requested. All service connections are subject to appointment availability.

The Customer Service Guarantee (CSG) sets out minimum performance standards in relation to service connection times, fault repair times and keeping appointments.
